

# **Kings Island**

## **Forest Habitat Enhancement**

### **ASH TREE REMOVAL**

Emerald ash borer (EAB) is an invasive insect that has killed millions of ash trees throughout the eastern half of the U.S. and southeastern Canada. There are now 46 counties in Minnesota with known EAB infestations.

**ASH TREES INFESTED BY EAB NEAR THE MAIN TRAIL AND DUCK BLINDS WILL BE REMOVED TO ENSURE PARK USER SAFETY**

**FUTURE HABITAT ENHANCEMENT ACTIVITIES INCLUDE:**

- ◆ BUCKTHORN CONTROL
- ◆ TREE PLANTING

**The City of Anoka and Anoka Conservation District are working together to enhance the habitat at Kings Island.** Contact ACD Restoration Ecologist if you have questions or you are interested in planting trees .
